# Canadian Electronics Engineering

■ A Maclean-Hunter Business Publication, 481 University Avenue, Toronto

# INDEX OF TECHNICAL ARTICLE

*Classifications used here correspond to the Professional Technical Groups of IEE*

## 1963

| | Issue | Page |
|---|---|---|
| **Aero-Space** | | |
| Canada's role in space communications, Harold Price | Dec. | 46 |
| Ground-based receiver uses step-tuning to track HF signals from Alouette, R. W. Southern | July | 34 |
| ITU allocates frequencies for space radio | Dec. | 49 |
| **Antennas and Propagation** | | |
| Biconical monopole antenna design data, J. Y. Wong and J. V. Wall | Apr. | 40 |
| **Circuit Theory** | | |
| A direct method of in-circuit measurement of tube and transistor transadmittances, D. S. Dorcas and R. N. Scott | Sept. | 86 |
| High-level video noise sources — an appraisal of four types, T. H. Shepertycki | Feb. | 36 |
| Multi-pulse generator has many uses, R. P. C. Paul | Apr. | 51 |
| Ring-counter circuit uses complementary pair transistors as a pnpn structure, J. Leng and J. C. Irvine | Jan. | 45 |
| Simulation of inductance by active circuit elements, G. W. Holbrook and D. L. McKeown | Nov. | 47 |
| Switching circuit boosts efficiency of dc regulator to 90%, A. S. Watson | Apr. | 54 |
| This circuit simplifies measurement of tube and transistor admittances, G. W. Holbrook | Apr. | 44 |
| Transistorized regulator gives reliable control of battery charging rate, F. Vachon | Feb. | 47 |
| **Communications Systems** | | |
| B.C. scatter system goes into service | Aug. | 39 |
| Common carriers plan new services | Dec. | 43 |
| Communications in Canada | Dec. | 31 |
| Communications in Canada's North | Dec. | 42 |
| Maps of major communications networks | Dec. | 33 |
| New Ottawa group will integrate government communications plans, Ian R. Dutton | Dec. | 38 |
| New techniques increase speed of telephone switching | Dec. | 45 |
| Ontario meat packers conduct Dutch auctions on new teletype system | Feb. | 41 |
| **Component Parts** | | |
| Solid tantalum capacitors, Hans Reiche | Mar. | 65 |
| **Electron Devices** | | |
| Here's what you should know about solid state integrated circuit development, F. W. Carroll | Oct. | 30 |
| **Instrumentation and Measurements** | | |
| Curve tracer and Beta checker displays semiconductor characteristics on CRT, B. E. Bourne | May | 43 |
| How to measure TV antenna impedance, B. M. Berridge | Oct. | 25 |
| New wiring analyzer cuts testing time, J. Peter McGregor | Nov. | 36 |
| **Military Electronics** | | |
| Pilot's eye view is projected on screen in visual-simulation flight trainer, P. M. Carey | Feb. | 31 |
| **Product Engineering and Production** | | |
| Selecting the right power inverter can save you money and avoid equipment failure, R. W. Taylor | Aug. | 34 |
| Portable thermoelectric pump controls heating or cooling of single component, David M. Makow | Aug. | 26 |
| Selecting the right power inverter can save you money and avoid equipment failures, R. W. Naylor | Aug. | 34 |
| Try multi-fixed programming to cut your testing costs, R. Swirsky | Apr. | 48 |
| **Reliability** | | |
| An accelerated method of measuring semiconductor device reliability, C. J. Van Leeuwen | Nov. | 42 |
| Analysis of tube performance leads to higher reliability for microwave system, David J. Clelland | Feb. | 44 |
| Coming: more exacting reliability programs for military equipment | Aug. | 32 |
| Electronic and environmental testing in Canada, A. P. Harris | May | 29 |
| These testing facilities help upgrade Canada's electronic capabilities | May | 37 |
| **Feature Reports** | | |
| Air Industries Association takes close look at government-industry relations, Peter Brannan | Oct. | 37 |
| Canadian Electronics Conference plans are well under way | July | 40 |
| 1963 Canadian Electronics Conference Preview | Sept. | 59 |
| Canadian R&D funds: where they come from — where they are spent, Ian R. Dutton | July | 28 |
| 1963-64 Components and Equipment Directory | June | 90 |
| Defence electronics contracts and expenditures down again in 1962 | Aug. | 23 |
| EIAC wants an active government-industry liaison committee in Industry Department | July | 32 |
| 1962 electronic imports from the U. S. increased 14% over 1961 | July | 38 |
| Government decides to set up a central telecommunications planning unit | Jan. | 42 |
| How to sell electronics in world markets | Mar. | 60 |
| Industry review and forecast, 1962-63 | Jan. | 30 |
| Latin America provides opportunities for Canadian electronics firms | Oct. | 34 |
| Microcircuits and lasers steal the show: report on IEEE convention | Apr. | 57 |
| New Products Review | Mar. | 50 |
| Report shows Manitoba could double electronics production in 12 years, Raymond A. Tulloch | Apr. | 39 |
| Satellites and lasers highlighted the 1963 Canadian Electronics Conference | Nov. | 40 |
| Strong Canadian group attracts interest at aeronautics and space show in Paris, John R. Simpson | Aug. | 30 |
| These companies want to "Sell Canadian" | Mar. | 62 |
| Trade missions found these prospects for your products in foreign markets | Jan. | 40 |
| Use this guide: don't be caught by plant shutdowns | May | 40 |

## 1964

| | Issue | Page |
|---|---|---|
| Radio distress beacon has 30-mile range D. M. Makow, H. R. Smyth, S. K. Keays | Feb. | 34 |
| **Applications of electronics** | | |
| Underwater position indicator radiates pulses to tell where it is hiding, D. M. Makow, H. R. Smyth, S. K. Keays | Apr. | 34 |
| New concepts in ship control, E. R. Axelson | Apr. | 38 |
| Watch ETV developments in U.S.—they will affect Canadian schools, Ian R. Dutton, Maurice Cutler | June | 24 |

# S PUBLISHED IN 1963 and 1964

*E. Articles are arranged alphabetically under each classification.*

| | Issue | Page |
|---|---|---|
| What will happen to printers in the electronic age? Geoffrey Spark | Aug. | 30 |
| Electronic system will speed up Montreal Stock Exchange trading | Sept. | 55 |
| **Biomedical electronics** | | |
| Remote cardiography can bring instant diagnosis to doctors | Aug | 32 |
| New machine monitors hearts of unborn babies | Dec. | 32 |
| **Circuit theory** | | |
| Synthesis of filters with maximally flat passband and arbitrary stopband loss, G. C. Temes | Feb. | 29 |
| Coulometer controls battery charging | Feb. | 42 |
| Graphical design of switching circuits, J. Sanjana | Apr. | 30 |
| An old theorem gives a new twist to relative phase calculations | Apr. | 41 |
| Solid State FM tuner has high spurious rejection, John A. Manning | Aug. | 28 |
| Distortion correction using a non-linear divider, G. W. Holbrook, A. E. Marble | Oct. | 30 |
| Airborne S-band diplexing filter has isolation of 40 db, J. H. Craven | Oct. | 32 |
| Variable phase-difference network has constant attenuation, Ronal Swirsky | Nov. | 26 |
| **Communications** | | |
| Low cost communications system uses light beam | May | 38 |
| Canadian Symposium on Communications | Sept. | 37 |
| Communications progress and research theme for military symposium | Nov. | 39 |
| Communications in Canada—Special Feature | Dec. | 23 |
| Home markets are growing, but big potential is in exports | Dec. | 23 |
| One-watt solid state microwave radio now reality, P. W. Waddington, K. Logan | Dec. | 26 |
| Canadian-built display unit helps report U.S. elections | Dec. | 31 |
| Color maps of major radio communications networks in Canada and principal submarine cables of the world | Dec. | 33 |
| How digital techniques are used to measure telegraph distortion, Herbert E. Haddow | Dec. | 37 |
| Electronic telephone switching opens new service prospects | Dec. | 41 |
| It's hockey night in Canada (story of CBC mobile TV unit) | Dec. | 48 |
| **Education** | | |
| Engineer training outlook appalling, says college head | Aug. | 27 |
| **Industry and market information** | | |
| Radio planning board has active year | Jan. | 28 |
| Tax submissions highlight EIA year | Jan. | 29 |
| Consumer sales maintain healthy level | Jan. | 30 |
| Electronic imports and exports continue to climb | Jan. | 31 |
| Electronics production sharing balance is $57 million in Canada's favor | Jan. | 32 |
| United Nations projects offer export possibilities | Mar. | 54 |
| Emphasis at IEEE Convention is on industrial and commercial electronics | Apr. | 35 |
| General McNaughton earns IEEE Founders Award | Apr. | 45 |
| Middle East provides sales possibilities for Canadian electronics companies | May | 34 |
| Saskatchewan telephone service grows | May | 36 |
| Teletypewriters made here will soon have 100% Canadian content | May | 37 |
| CN/CP Telecommunications income declined last year | May | 38 |
| New federal department assembles staff and forms plans to help industry | June | 20 |
| Defence electronics contracts climb in 1963 after three-year decline | June | 22 |
| Scientific Secretariat will guide Canadian research policy, Maurice Cutler | June | 27 |
| Guide on plants closing | June | 29 |
| Components & equipment directory | July | |
| Electronic imports from U.S. during 1963 | Aug. | 39 |
| Field day for boffins at U.K. show, John H. Baldwin | Aug. | 37 |
| Fragile? Just give it a big heave (packaging of electronics products) | Sept. | 50 |
| Federal grants stimulate interest in research | Sept. | 53 |
| BBG postpones November 3 hearings on color TV | Oct. | 24 |
| Air freight can help you develop new markets, Geoff Spark | Nov. | 32 |
| Tougher anti-combines laws in prospect | Nov. | 37 |
| NASA offers opportunities for Canadian firms to sell skills | Nov. | 38 |
| Home markets are growing, but big potential is in exports | Dec. | 23 |
| TV companies in U.S. are "buying Canadian" | Dec. | 44 |
| **Instrumentation and measurement** | | |
| Measurement, trouble-shooting techniques for solid state audio equipment, R. W. Ward, V. R. Barr | Feb. | 36 |
| Portable TV recorder's stop-motion allows transient signal analysis. | June | 26 |
| Massive TNT blast rocks prairies in research test | Sept. | 56 |
| Laser facilitates precise measurements | Oct. | 35 |
| **Product engineering and production** | | |
| New: printed circuit pin-up board, G. W. Morton | Jan. | 36 |
| Feature report on Canadian products | Mar. | 42 |
| Simple oscillators increase capability of FM-FM telemetry systems, J. K. Pulfer | Mar. | 56 |
| New TV camera has high sensitivity, small size | Apr. | 44 |
| Experimental machine reads hand-written numbers | Apr. | 44 |
| How fibre optics improve the resolution of radar mapping systems, Edward Barber | May | 30 |
| Microcircuits have arrived | May | 40 |
| Permanent Electrical Connections special feature | Aug. | 19 |
| Plastic models aid payload planning for rockets S. G. Jones, R. S. McClean | Oct. | 28 |
| Standards for micro-electronics, A. P. Harris | Nov. | 35 |
| Instant-heating tubes start working within half a second, Roy Bennett | Dec. | 46 |
| **Reliability** | | |
| We need a new approach to reliability, Arnold Simoni | Mar. | 52 |
| Industry, government must co-operate to overcome reliability problems, L. F. Bennett | Mar. | 52 |
| Component reliability, L. F. Bennett | Nov. | 29 |
| **Space electronics and telemetry** | | |
| Industry-space telemetry gap widens, L. A. Steiner | Jan. | 34 |
| The case of the disappearing sun spots, Ian R. Dutton | Jan. | 38 |
| Canada's future role in space research | Mar. | 59 |
| Computer helps map ionospheric absorption over Canada | Sept. | 52 |
| Space probe data leads to new concept of earth's upper atmosphere, Irvine Paghis | Oct. | 26 |
| Montreal APT station part of firm's efforts to expand export markets | Oct. | 36 |
| Alouette II ready to fly soon | Nov. | 23 |
